

Queen of Swords

Overview

The Queen of Swords is a righteous and relentless fighter, capable of ending a sculpted being in a single turn. Take your time, work together, and beware her blade. But as she weakens, beware your friends too.

Stances

The Queen of Swords switches between three stances as she fights. She remains in her active stance for the entire turn. At the end of her turn she assumes the most recently mentioned stance. Tuck the boss card that swapped her stance underneath that stance.

Relentless Stance

An aggressive stance with high mobility and devastating attacks, but very little defence.

Defensive Stance

A heavily armoured stance with wide sweeping strikes, but with low mobility.

Ranger Stance

A moderately defensive stance focused on retreating and making ranged ensnaring attacks.
